APRIL 26, 2024

# DINNER MEETING

## A TAKE ON HUMAN CAPACITY BUILDING FOR THE NUCLEAR ENTERPRISE

### ABSTRACT

People are our most valuable resource, and how we engage with future generations is paramount. Lisa will share experiences from the informal and formal pre-college and college spaces. What do students have to say? How do we create an environment for students to thrive? What is our individual role in attracting and retaining new professionals in our field? How do we move the needle of community engagement? Our discussion will focus on where Lisa sees the need, where we can make a difference, and how to strengthen alliances.

### BIOGRAPHY

Lisa Marshall is the Assistant Extension Professor at NC State University Department of Nuclear Engineering and VP/President-Elect for the American Nuclear Society. Lisa joined the department as their Director of Outreach, Retention and Engagement and has 20+ years of experience in the pre-college and college spaces.

Lisa works at the social sciences – science/engineering nexus, contributing as a working group member for the OECD Nuclear Energy Agency Global Forums on gender balance, and nuclear perception and society. She is the co-PI for the US Department of Energy (DOE)-funded Consent Based Siting for Interim Storage and served as the educational outreach director for the DOE-funded Consortium for Nonproliferation Enabling Capabilities.

Lisa loves teaching in NC State's Engineering First-Year Program and co-directs its Study Abroad Program in Engineering and Social Sciences. Former chair for the ANS Education, Training and Workforce Development Division, Lisa was the co-founded the ANS Diversity and Inclusion Committee as well.

Lisa loves to travel, try new recipes, read sci-fi novels, and recently connected with pilates.
